

# KEY EXTREME

## KEY278

### TECHNICAL BULLETIN

#### *Wheel Cleaner*

#### **Description**

Key Extreme is a non-alkaline, ready-to-use spray-on, rinse-off wheel cleaner. It is tough on brake dust, grease and road grime and rinses off easily after application. It also contains metal brighteners specifically designed to clean and brighten most aluminum, painted and spoke wheels, leaving them shiny and bright.

#### **Benefits**

Key Extreme is gentle to use and does not cause bronchial irritation often related to other wheel cleaners. It is safe to use on all OEM wheels and increases the shine and appeal of all metal and plated metal surfaces. It is a very effective underbody cleaner/detailer for chassis and suspension as well. Key Extreme delivers exceptional results and is easily applied and rinsed clean.

- ◆ Ready-to-Use
- ◆ Quickly Removes Road Grime
- ◆ Leaves Wheels Exceptionally Bright
- ◆ Non-Alkaline Solution
- ◆ Pleasant Scent
- ◆ Rinses Film-Free

#### **Directions**

- 1) Apply cleaner to cool wheels using high quality spray bottle or tank sprayer and rinse well. Requires little or no dwell time.
- 2) Optimum results can be achieved through tank sprayer application, this allows for a more uniform spraying application.
- 3) For normal use, dilute up to 6:1. For heavily soiled wheels, spray at full strength
- 4) On wheels where substrate or clear coat integrity is questionable, test small inconspicuous areas first to ensure compatibility.

**Note:** Test any non-factory wheels in a small, discreet section, preferably on the backside of the wheel, to assure compatibility.

#### **Sizes**

Quart, Gallon

**See Material Safety Data Sheets for Warnings and Safety Information**
